

USB C to VGA External Video Adapter with USB-A Hub and USB-C PD Charging Ports, 1920 x 1080 (1080p)

MODEL NUMBER: **U444-06N-VU-C**

Description

The U444-06N-VU-C USB 3.1 Gen 1 to VGA DisplayPort Alternate Mode External Video Adapter supports USB DisplayPort Alternate Mode for displaying video on a VGA monitor via your computer, laptop or tablet's USB-C port. It's an ideal tool for multitasking, editing documents, or giving presentations at trade shows and conferences.

No software or drivers are needed. Connect the adapter's USB-C male plug to the USB-C port on your device. Then, connect the adapter's VGA female port to a monitor using a VGA cable (such as Tripp Lite's P502-Series) to see full VGA video. The U444-06N-VU-C supports high-definition video resolutions up to 1920 x 1080 (1080p) at 60 Hz.

The USB 3.1 hub port connects USB-A peripherals, such as a thumb drive or printer. It's backward compatible with previous USB generations, and supports USB 3.1 Gen 1 data transfer rates up to 5 Gbps.

The USB-C Power Delivery (PD) charging port supports power input up to 20V 3A (60W). It powers the device that the U444-06N-VU-C is plugged into, as well as a peripheral plugged into its USB-A port, by connecting the charging port to a USB-C wall charger.
