

# Hi-Speed USB 2.0 Automatic Sharing Switch

**1x2 Ports, Dual Control**

**Model**  
162005

## **Easily connect and share a USB peripheral.**

The MANHATTAN® Hi-Speed USB 2.0 Automatic Sharing Switch easily allows two computers to share a USB device. It's ideal for home and office use where users need to share a USB cable modem, printer, digital camera, scanner, external storage drive or other peripheral. Use the convenient access-on-demand switching for activation with a single click of an onscreen button, or use onboard switches to manually select an active computer. With built-in automatic sharing capability, the MANHATTAN Hi-Speed USB 2.0 Automatic Sharing Switch detects and switches when print commands are executed. Idle-timeout switching helps ensure that data is fully sent from the active printer buffer to the printer before the connection is disengaged to await next print command.

### **Quick and Easy Installation**

Plug and Play installation is easy with Windows and Mac systems. The MANHATTAN Hi-Speed USB 2.0 Automatic Sharing Switch requires no special drivers or external power supply. Connect using the included USB cables for fast access to popular devices.

### **Lifetime Warranty**

Strict manufacturing standards ensure the highest quality in all MANHATTAN products. All items carry a full Lifetime Warranty — the strongest quality commitment anyone can make.
