

Copper Cabling Solutions

Category 5e FTP Patchlock Leads

The Cat 5e Patchlock leads from Connectix provide extra security when installed in public areas as they prevent the risk of unauthorised disconnection of critical network connections. A Removal Key must be used to release the secure lock thus allowing the patch lead to be removed. The Connectix Cat 5e FTP Patch Leads are designed to exceed the performance requirements of the Cat 5e Specification. The fully shielded patch leads increase signal isolation and prevent contaminant noise from entering the cabling system.

Connectix Patch Leads are made from Connectix Cat 5e shielded cable and are terminated using high performance modular plugs. Each lead is individually factory tested to Cat 5e standard to ensure true standard compatibility. Leads are available in lengths from 0.5 metres, and in several different colours.

Features & Benefits

- Individually performance tested
- Uses fully shielded cable
- Made to order in any length
- Offers enhanced security
- Removal tool required

Product Specifications

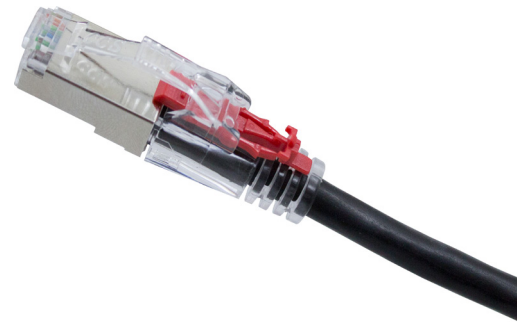

Plug	High performance 50 um gold plated
Cable	Enhanced Category 5 shielded cable
Cable Shield	Overall braid and individually foiled pairs
Conforms to	EIA/TIA-568-C
Boot & Secure Lock	Polycarbonate
Key	Polycarbonate
