

Category 6a FTP 2020 Series High Density Panels

The Connectix 2020 Series Patch Panel is an alternative to The High Density Panel. It offers the same performance as the standard panel but has been designed to present the cable termination IDCs horizontally on a tray at the rear of the panel, making termination and cable management easier.

Connectix 24 Way Panels achieve optimum transmission performance

by incorporating the highest quality components and innovative on-board compensation techniques.

This panel offers extended PowerSum characteristics and exceeds the ANSI/TIA-568-C specifications. When combined with Connectix Modules and UTP Cable the link will perform well in excess of the stated Specification.

Features & Benefits

- Write-on designation labels suitable for application of custom-print labels
- LC, SC, ST and FC fibre modules are also available, complete with a Starlight compatible gland hole and integrated management tray
- Blank modules included for future expansion

Product Specifications		
Width (mm)		483 (19")
Depth (mm)		98
Height (mm)		44.5 (1u)
Fixing Centres (mm)		467
Material	Mild steel sheet CR4 to BSEN 10130-1999 DC01	
Finish	Matte black polyester paint	
Socket	High Performance side entry RJ45 jacks	
Socket Labels	Write-on silk screen on panel front	
IDC Labels	Colour coded labels to T568B	
Cable Management	Improved cabling facility with easy to use cable tie positions for left and right cable entry	
IDC Blocks	4-way industry standard IDC blocks	
Conforms To	TIA-568-C.2
